

Your Preferred Matrix Supplier

Preferred Matrix

Freepoint has identified certain markets that we can create a simple, winning daily matrix product for our brokers to sell, for Freepoint to execute, and most importantly for our shared end-use customers to benefit from.

Freepoint Matrix Guidelines

- Please send all completed contracts and direct all questions to Contracts@freepointsolutions.com
- Prices do not include GRT
- Price does not include broker fee. To include enter in cell G3
- Contracts must be executed on Freepoint Standard Contract Forms.
- Ohio Small Commercial Customers (i.e. customers with annual electricity consumption at or below 700,000 kWh) must execute the form designated as OH_SCOM_Standard Form.
- All contracts must be received before 4:00PM (Eastern Standard Time) on "Effective Date" to be accepted
- Prices provided on this sheet only apply for contract length, rate class and utilities included. Contact Freepoint for custom pricing
- All contracts must be accompanied by an utility bill from the prior 60 days for each account supplied under the contract
- Multi-meter contract submissions must be by uniform rate class, utility and contract length
- All contracts in aggregate should not exceed 1000MWh. If they do, please contact Freepoint for custom pricing
- Contracts will be reviewed for compliance by state and will be rejected if they fail to meet required thresholds and guidelines
- Freepoint reserves the right to reject contracts for market movements and credit reasons
- The Matrix is not intended for customers with seasonal or irregular load profiles (i.e. dry cleaners, churches or other religious facilities, golf courses, plant nurseries) or customers with less than 12 months historical usage. Each deal is subject to Freepoint's review and approval.
- This offer is NOT for protected class customers in Delaware and Illinois
 - Delaware – a protected customer is a customer taking service under the Utility's tariff governing service classification Small General Service-Non Demand Rate
 - Illinois – a protected customer is a non-residential customer of with annual electricity consumption at or below 15,000 kWhs

***Disclaimer: There will be restrictions on certain customer types we will not accept. Freepoint will ensure that it states those restrictions with our daily pricing to ensure a seamless sales offering to your customers. Freepoint reserves the right to add to the restricted customer type list at any time, and also reserves the right to rescind this new matrix offering at our sole discretion.**
